

AUSTRALIA

More than just kangaroos, deserts and beaches

The Red Continent undoubtedly offers more than that! Travelling for two months from North to South we came across many amazing landscapes: towering forests, marshland, surreal canyons and rock formations, charming wine regions and wild coasts.

The varied fauna is not less fascinating: besides the most famous kangaroos we encountered snug koalas, frightening crocodiles as well as countless colourful birds.

We began our tour in Darwin and ended up in Sydney. Depending on the expected road conditions we travelled either by jeep, mobile home or car. Sometimes we had to cut the huge distances short by taking a plane. However, we did not view the impressive landscapes only from our car, but actually hiked through them. The most memorable views though we enjoyed on spectacular scenic flights.

We have packed our impressions and experiences into a convincing Multivision Show. Inspiring music and informative comments complement the pictures.

- *Multivision Show in two parts*
- *Projection with HD beamer*
- *770 Digital photos taken with Nikon cameras und lenses*
- *Duration: 76 minutes*
