

Travelling by Motor Home to seven National Parks of the USA

WONDERFUL WILD WEST

A six weeks, 4000 km long journey took us through varied and fascinating Countryside. No doubt very photogenic and full of surprises.

Countless geysers and herds of bisons in **Yellowstone** encouraged us to take lots of photos. **Grand Teton** impressed us with lakes and giant granite mountains. We admired the magnificent rock formations in **Arches**. The scenery of the **Monument Valley** has appeared in many Western movies.

The geology of **Capitol Reef** offers a surprising choice of formations and colours. The threatening, vertical cliffs of the **Zion Canyon** made us feel like very small ants.

Bryce Canyon is breathtakingly beautiful. We thought standing in front of a cathedral with a thousand steeples!

Our Multimedia Show is the result of our photos and impressions. A mixture of various music genres accompanies the amazing diversity of these American National Parks.

- . **Multivision Show**
in two parts
- . **Projection with HD-Beamer**
- . **570 Photos taken with**
Nikon reflex camera (D700)
and lenses
- . **Duration: 62 minutes**
